

**South Dakota Work Plan
FY2007**

TTA Ticket Number:	3922
NRC:	NRC for Child Protective Services
State:	South Dakota
Contact Person:	Weyer, Merlin
Initial Contact Date:	10/06/2006
TA Lead Staff:	Holder, Todd
Tribes Served:	
Service Request:	Technical assistance is being requested to provide continued support and consultation related to the effective implementation of the state's ongoing services process. The Protective Capacity Assessment, and case plan evaluation process, the Protective Capacity Case Plan Evaluation were implemented in the past year through consultation with the resource center. Technical assistance, at this point, will also involve further conceptualization and development of ongoing safety intervention, including consideration for ongoing safety management/provisional protection, policy and procedure development, conditions for return/reunification, and evaluating child safety at case closure.
Reason for Request:	This is a continuation of extensive work related to the conceptualization and development of the Protective Capacity Assessment. This will impact effective implementation of the Protective Capacity Assessment through the development of the state's capacity to provide internal technical assistance to field sites. This technical assistance will further develop the state's ongoing goal to integrate the Initial Family Assessment and ongoing safety management through the development of a overarching safety intervention system throughout the life of a case.
Timeframe:	FY2007
RO Specialist Informed:	Yes
ACF Contact Person:	Gomez, Kevin
